

System's Green

Engines Humming, breeze is blowing, a sense of knowing, like stepping back in time.

Solar flares, system's green, accelerate! Realise your dream.

I was standing on the edge of the floor,
Eyes wide open, still expecting more,
Then you sidled up and started to dance,
I was miles away in another daze,
Passed into a kinda maze,
Nostalgia in a million ways,
The earth beneath me felt so good, but in an instant I was already gone,
Sucked Spinning into your Time Zone!

CHORUS

Into your time zone, she said woah, she said "let's go"
Spinning into your time zone, time zone, she said woah, she said "let go"

Some say it's just a time machine,
Only good when the system is green,
They tried to launch it out of the blue
Then the earth blew rocks like a volcano,
Passed into a kinda maze, nostalgia in a million ways,
The earth beneath me felt so good, but in an instant I was already gone...

Earth bound Sally said "I wanna wanna hunk of love!"
We said "it's over there, however, take your time and beware,
You could sneak a piece but watch out , she's gonna blow...

...you right back into your time zone"...into your Time Zone!

CHORUS
